

Reshaping Music Education for Emerging Generations

ZOE MADEWELL

EDUCATOR - INNOVATOR - AUTHOR

My Mission Is To Enhance Early Childhood Learning By Passionately Championing The Fusion Of Music And Language

Zoë Madewell, rising from a challenging past, has dedicated her life to music education, intertwining it with language learning in early childhood. Through her initiative, **Musicology Lab**, she utilizes musical instruments as tools to engage children in exploring languages, enhancing their cognitive development. This innovative method not only enriches musical appreciation among young learners but also bridges cultural and linguistic diversities, embodying Zoë's mission to create a harmonious global community through the universal language of music.

2018

ZOË MUSICAL-LINGUIST INNOVATOR

Zoë Madewell's innovative approach, blending music with language learning, is carving a new path in early childhood education. Her program, by intertwining piano lessons with foreign language instruction, is not only making learning engaging but is significantly enhancing the cognitive development in children, making them "musical-linguists." Through her initiative, Zoë is rewriting the script of traditional teaching, bringing a fresh, beneficial outlook towards nurturing the linguistically and musically enriched minds of the future

INNOVATIVE TEACHING:

Lighting up those magical parts of young brains through music and catalyzing multi-language learning at the same time, is the genius approach that Zoë has invented through her decades of teaching music to young and old.

GLOBALEXPANSION:

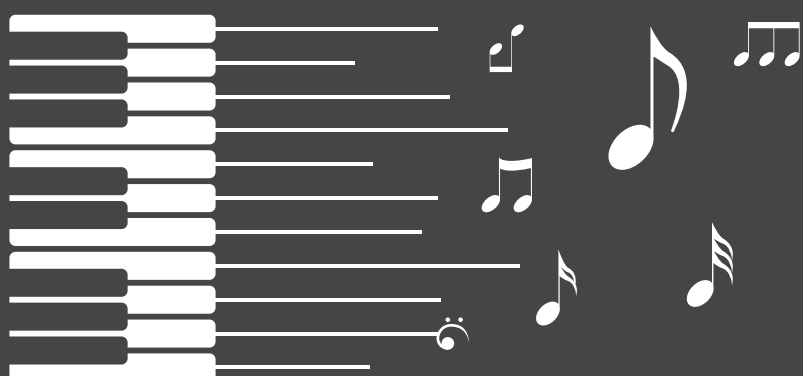

Recently expanded her program to Dubai adding Arabic and training teachers remotely, proving that her innovative approach can be implemented in any part of the world.

UNIVERSAL MELODY:

Her teacher-training program and student kit has already been created, tried and tested in English, Spanish, Mandarin, French & Arabic. More languages are being added to this universal program.

MONTESSORI COLLABORATION:

Partnering with Montessori schools to add this music-language combination to the curriculum.

"My road to my success has not been easy. I taught myself to play on an old donated piano with sticky keys and in under 4 years I opened my music school, added a ballet school, started an orchestra at my kids underfunded charter school, won 2 biz awards and was recognized in a national women's magazine. I think my past, my struggles are the key to my success."
